

Water (chemical substance)

[@wikipedia](#)

Chemical substance with Chemical Formula: H_2O .

In narrow meaning it defines liquid form of water to discriminate it from ice and vapor which have the same molecular formula.

It is transparent, tasteless, odorless, and nearly colorless chemical substance,

It is the main constituent of Earth's streams, lakes, and oceans, and the fluid of most living organisms.

Dynamic properties of water			
Water Density ρ_w	Water Formation Volume Factor B_w	Water Compressibility c_w	Water Viscosity μ_w
