

Permeability-pressure correlations

Correlation between **absolute permeability** $k_a(p)$ at a given **reservoir pressure** p and **initial absolute permeability** k_{ai} at **initial formation pressure** p_i

Correlation	Name /Author	Scope
(1) $k_a(p) = k_{ai} \cdot \exp[-c_k \cdot (p_i - p)]$	Yilmaz and Nur	Wide pressure range below p_i : $p \leq p_i$
