

Reservoir flow drive mechanisms

Physical processes supporting [reservoir flow](#):

Compaction drive	Oil Drive	Gas Drive			Water Drive	
		Solution Gas Drive	Gas Cap Drive	Gasflood	Waterflood	Aquifer Drive
Natural Flow Drive			Artificial Flow Drive		Natural Flow Drive	

It is closely related to the concept of [reservoir pressure maintenance](#).

All the above [reservoir flow drive mechanisms](#) are [natural](#) except [Waterflood](#) and [Gasflood](#) which are [artificial](#).
