

Extra Heavy Oil = Bitumen (fluid composition)

[@wikipedia](#)

A mixture of very high density [hydrocarbons](#) that stay [semi-solid](#) in [subsurface reservoir](#).

The usual composition ranges above C_{16} and [API gravity](#) is in the range of $4^{\circ} \div 10^{\circ}$ ([Specific Gravity](#) = $1.0 \div 1.04$).

It may also include minor [organic](#) and [inorganic](#) chemical substances (< 7% in weight).
