

Medium Oil (fluid composition)

[@wikipedia](#)

A mixture of medium density [hydrocarbons](#) that stay [liquid](#) in [subsurface reservoir](#).

The usual composition ranges between C_4 and C_8 and [API gravity](#) is in the range of $20.7^\circ \div 31.1^\circ$ ([Specific Gravity](#) = $0.87 \div 0.93$).

It may also include minor [organic](#) and [inorganic](#) chemical substances (< 7% in weight).
