

Geothermal Temperature Gradient

@wikipedia

A measure of [Geothermal Temperature Gradient](#) along the [True Vertical Direction](#) towards [Earth's](#) centre:

$$(1) \quad G_T = \frac{dT}{dz}$$

where

z	True Vertical Depth (TVD)
---	---

The typical range is $G_T = 0.021 \div 0.041 \text{ } ^\circ\text{C/ m}$ with world average being $G_T = 0.025 \text{ } ^\circ\text{C/ m}$.
