

Fluid Convection

[@wikipedia](#)

Synonym: [Fluid flow](#) = [Fluid Convection](#)

Particular type of [motion](#) with average [position](#) of all [fluid molecules](#) changing over time.

There are two major types of [Fluid flow](#):

Forced Fluid Convection	Natural Convection
--------------------------------	---------------------------

The important examples of [Fluid flow](#) are [Pipe Flow](#) and [Percolation](#).
