

Ideal Gas EOS @model

[@wikipedia](#)

Equation of State for the Ideal Gas:

$$(1) \quad \rho(T, p) = \frac{M}{R} \cdot \frac{p}{T}$$

where

ρ	Gas density	p	Gas pressure	M	Gas molar mass
		T	Gas temperature	R	Gas constant

Alternative forms

(2)	$p = n k T$	(3)	$p = \rho_m R T$	(4)	$p = \frac{R T}{V_m}$	(5)	$p V = \nu R T$	(6)	$Z = 1$
$n = \frac{\rho}{M}$	Gas concentration	ρ_m	Gas molar density	V_m	Gas molar volume	V	Gas volume	Z	Compressibility factor
k	Boltzmann constant					ν	Amount of gas substance
