

Maximum Absolute Percentage Error = MAXAPE

Synonym: [Maximum Absolute Relative Error \(MAXARE\)](#) = [Maximum Absolute Percentage Error \(MAXAPE\)](#)

[Statistical metric](#) characterizing the [model](#) prediction quality ([goodness of fit](#)) between the [datasets](#) of a given variable x and its [estimator](#) $\hat{x}$:

$$(1) \quad \text{MAXAPE} = \max \left\{ \left| \frac{\hat{x}_k - x_k}{x_k} \right| \right\}_{k=1..N}$$
