

# Maximum Absolute Relative Error = MAXARE

**Synonym:** Maximum Absolute Relative Error (MAXARE) = Maximum Absolute Percentage Error (MAXAPE)

Statistical metric characterizing the **model** prediction quality ( **goodness of fit** ) between the **datasets** of a given variable  $x$  and its **estimator**  $\hat{x}$  :

$$(1) \quad \text{MAXARE} = \max \left\{ \left| \frac{\hat{x}_k - x_k}{x_k} \right| \right\}_{k=1..N}$$
