

Live oil (chemical substance)

[@wikipedia](#)

Oil containing [dissolved gas](#) (which is also called [solution gas](#)).

The usual composition is [octane \(C₈\)](#) and higher [alkanes](#) with [API gravity](#) < 40.

May include minor [organic](#) and [inorganic chemical substances](#).

If [oil](#) does not contain [dissolved gas](#) then it is called [dead oil](#).
