

Barrel of Oil Equivalent = BOE

[@wikipedia](#)

[Oil Field](#) unit for natural gas volume: 1 [boe](#) = 6,000 [ft³](#) = 170 [m³](#)

The above is the [USGS](#) convention.

The alternative convention is provided by [U.S. Internal Revenue Service](#) as : 1 [boe](#) = $5.8 \cdot 10^6$ [btu](#) in energy terms which is equivalent to 1 [boe](#) = 5,800 [ft³](#) in volumetric terms.
