

Well-Reservoir Contact = WRC

The contact area between the [well](#) and [reservoir](#).

In non-fractured wells this would be the [well](#) walls.

In fractured [reservoir](#) this would be the fracture faces contacting the [reservoir](#).

The [Well-Reservoir Contact \(WRC\)](#) is closely related to the concepts of [Mechanical Skin-factor](#) and [Geometrical Skin-factor](#).
