

Petroleum Production

Part of [Petroleum Industry](#) related to managing [production](#) of [Petroleum Hydrocarbons](#) from [Petroleum Reservoir](#) all the way up to [Commercial Metering Station](#).

[Petroleum Production](#) is split into three operational areas:

Petroleum Production		
Surface Production	Subsurface Production	Field Development Planning
Production gathering	Well & Reservoir Management	Economics
Fluid supply & injection	Field Study & Modelling	Surface facilities
Production Performance Monitoring	Well & Reservoir Surveillance	Subsurface facilities
		Production Strategy
		Recovery Methods

A set of events presenting the execution of the [Field Development Plan \(FDP\)](#) are called [Production Complications](#) and split into two categories:

Well Performance Complications	Surface Production Complications
--	--
