

Mass Flux Vector

@wikipedia

A vector pointing along the fluid velocity \mathbf{u} and absolute value of the [mass flux](#):

$$\mathbf{j}_m = j_m \mathbf{n}$$

where

$\mathbf{n} = \mathbf{u}/ \mathbf{u} $	unit vector of the fluid velocity \mathbf{u}
--	--

It can be also expressed as:

$$\mathbf{j}_m = \rho \mathbf{u}$$

where

ρ	fluid density
--------	---------------
